Strategic dialogue

The Forum Health Region Baden-Württemberg was founded in 2018 on the initiative of Minister President Winfried Kretschmann in order to achieve closer inter-connections and greater cooperation between the areas of health research, healthcare and social care and the healthcare industry. Its stated aim is to further develop Baden-Württemberg as a leading location for medical research, the development and manufacture of medical products and the provision of modern and innovative healthcare. The Forum Health Region Baden-Württemberg currently brings together more than 500 stakeholders from companies, universities, research institutions and healthcare and social care.

Tasks and goals

The Forum Health Region Baden-Württemberg is an exchange and innovation platform for participating stakeholders from science, industry and healthcare and social care. The stakeholders within the Forum work to develop model projects with concrete added value for citizens. These projects are designed to have national and international impact and position Baden-Württemberg as a leading region on the international stage.

Fields of action within the Forum Health Region Baden-Württemberg

The Baden-Württemberg government is funding numerous projects ranging from personalised medicine, AI applications and telemedicine to new approaches in the field of healthcare and combating multidrug-resistant hospital germs. The Forum also addresses overarching issues such as utilisation of health data and promotion of innovation.

Added value for stakeholders

Stakeholders in the Forum Health Region Baden-Württemberg benefit from a strong network, close cooperation between healthcare and social care, research and industry and valuable first-hand industry information. At the same time, they also have the opportunity to actively contribute to the further development of the forum, to work together on cross-sectoral topics and, in interaction with the state government, to help shape the future of Baden-Württemberg as an internationally attractive health region.

The Forum Health Region Baden-Württemberg is coordinated by an inter-ministerial working group under the leadership of the Baden-Württemberg State Ministry. The coordination office is located at BIOPRO Baden-Württemberg GmbH.
